Analytical Chemistry (ACS
Publications) - History.
Noble gas is translated from
the German noun Edelgas,
first used in 1898 by Hugo
Erdmann to indicate their
extremely low level of
reactivity. The name makes
an analogy to the term
"noble metals", which also
have low reactivity. The
noble gases have also been
referred to as inert gases,
but this label is deprecated
as many noble gas
compounds are now known.
